

HEAT & UVB BASKING FIXTURE

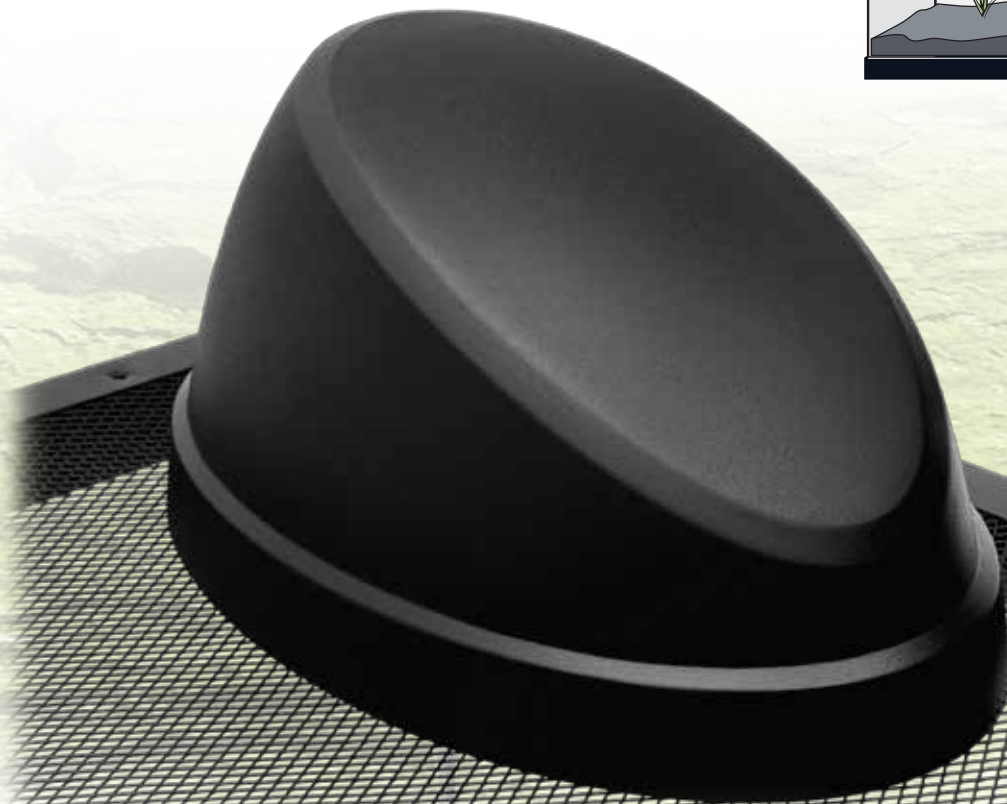

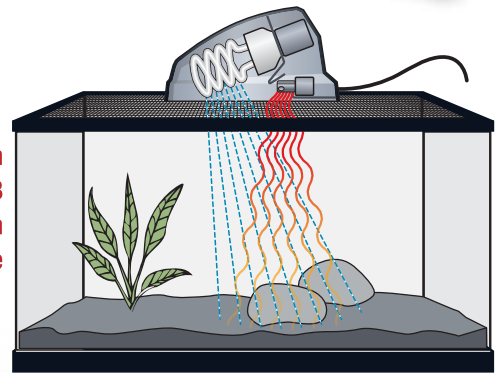

Delivering the right combination of heat and UVB are essential to the development of healthy reptiles. Zilla® Mini Halogen Bulbs are compact and provide an excellent source of heat while UV bulbs provide ultraviolet energy that pets need for proper bone development and healthy metabolism.

Zilla® Heat & UVB Basking Fixture provides:

- Provides a concentrated basking spot area
- Simulates the effects of a mercury vapor lamp while using less energy
- Great for desert or tropical reptile environments

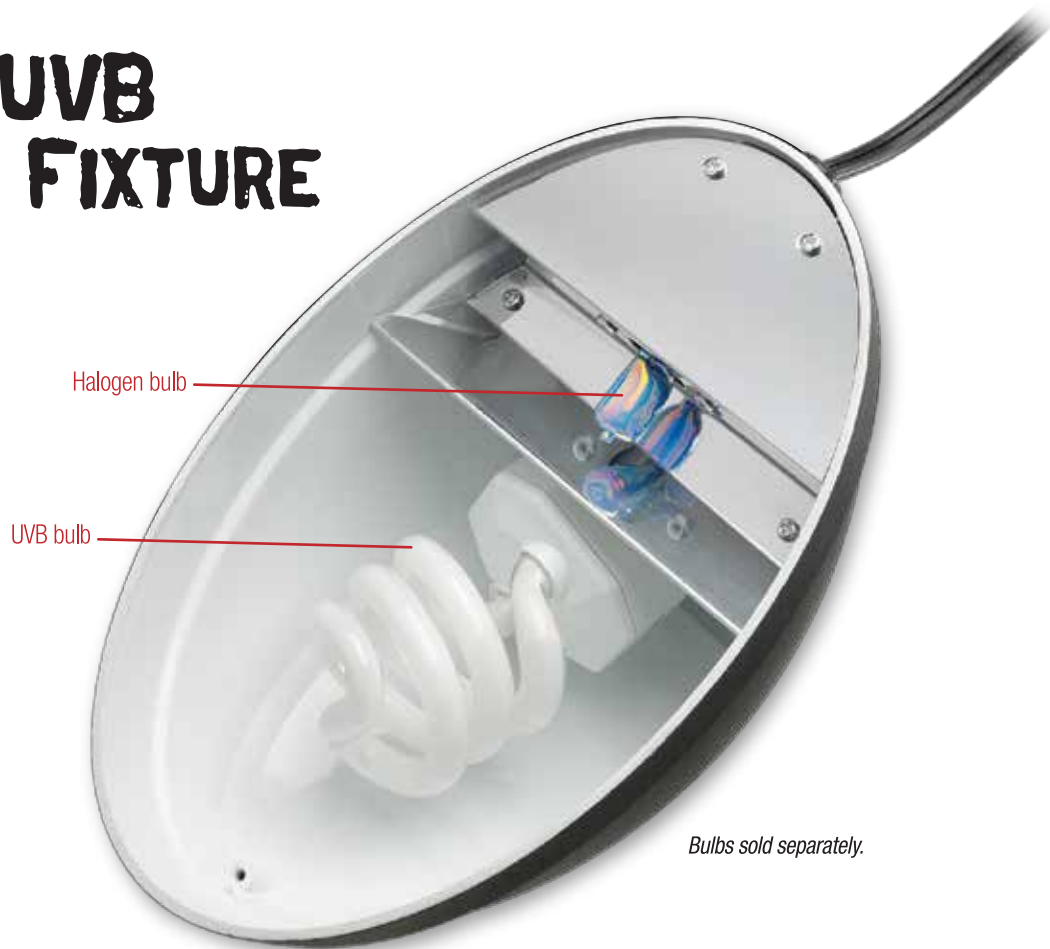

Unique design overlaps UVB and heat all in one fixture

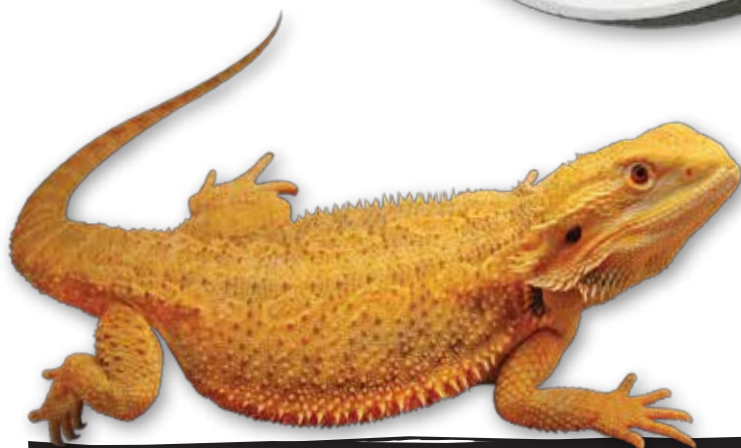

HEAT & UVB BASKING FIXTURE

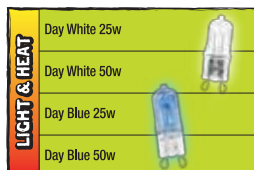

Bulbs sold separately.

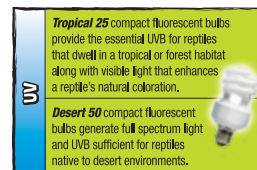

Zilla® Mini Halogen Bulbs

For healthy light and essential warmth, few reptile bulbs offer better long term performance than Zilla® Mini Halogen Bulbs. High intensity output, energy efficient and compact.

Zilla® Compact Fluorescent Bulbs

Zilla® bulbs deliver essential ultraviolet and/or infrared energy pets need for proper bone development, healthy metabolism, and a proper level of activity.
