

DIGITAL INFRARED THERMOMETER

A safe and easy way to check for proper temperature

Maintain proper temperature throughout the reptile's habitat. Reptile owners can test basking spots, caves, even herps themselves for safe and healthy temperatures with a Digital Infrared Thermometer. LCD display measures both Fahrenheit or Celsius. Accurate (+/- 2.5° F) infrared technology runs on two 1.5V cell batteries and measures temperatures from -27° F to 230° F. Healthier reptile living environments start with a Digital Infrared Thermometer.

Features and Benefits:

- Measure temperature of basking area, caves or herps
- Non-contact infrared thermometer
- Easy point-and-press action
- Large, clear LCD display
- Can be changed to Fahrenheit or Celsius
- Wide measurement range
- Batteries included
- Conveniently packaged for shoppers to try before buying

REWARDS

BATTERY REPLACEMENT: A flashing battery icon in the LCD indicates a low battery. To replace a low battery, confirm that the unit power is OFF, loosen the screw on the back cover and replace both of the old batteries. The Zilla Digital Infrared Thermometer requires two (2) LR44 1.5V cell batteries.

NOTE: Dispose of all unused batteries properly and keep all batteries away from children.
