

WHERE REPTILES RULE

INCANDESCENT LIGHT & HEAT SPOTS

FOCUSED HEAT AND LIGHT CUSTOMIZES REPTILE HABITATS

Creative terrarium designers love Zilla Spotlights, which pinpoint light and heat in any area for a more dramatic visual effect. Spot heat lamps create warm zones, allowing reptiles to move away from the heat source as their body temperature changes. Another bonus: heavy-duty filaments yield more hours of service from every bulb. Choose from a range of bulbs to meet specific pet care needs.

FEATURES AND BENEFITS

- Directs heat and light where it's needed most
- Heavy-duty filaments for longer bulb life
