

LOW PROFILE FIXTURES

- Low profile fixtures reduce bulk of standard domes
- **Dual:** Combines heat, UVB and visible light into a single fixture.
Single: Provides space for heat or UVB bulb
- Spring clips secure it to the screen
- Provides uniform light and heat
- Ceramic socket withstands heat
- Accommodates energy saving Zilla® Mini UVB Bulbs and Zilla® Mini Halogen Bulb *(sold separately)*

Dual Low Profile Fixture: Dual socket design allows for both heat and UVB - *all in one fixture*

Single Low Profile Fixture: Horizontal design can hold either mini halogen bulb for heat or CFL for UVB

Dual Low Profile Fixture

Single Low Profile Fixture

ZILLA® REPLACEMENT BULBS *(sold separately)*

• Zilla® Mini Compact Fluorescent Bulbs

Tropical bulbs provide essential UVB and visible light for reptiles that dwell in a tropical or forest habitat.

Desert bulbs generate visible light and sufficient UVB for reptiles that are native to desert environments.

• Zilla® Mini Halogen Bulbs

These small energy efficient bulbs provide healthy light and essential warmth needed for reptile environments.
